

AKTOO Site Review

The current version of the site looks fantastic! I appreciate this is still a work in progress but please find included here a list of fixes/suggested improvements for the site as is.

Site Functionality:

- At smaller breakpoints, the site isn't responsive. Eg: Text and imagery bunches up when browser is reduced in size; mobile breakpoints don't display correctly (see below)

- Site shifts on click. In a couple of places, the entire page moves (normally R to L). Eg: when User clicks Home > Browse, the whole page shifts. Is this a scroll bar issue?
- No burger menu when in logged in to "Role Admin". Makes navigation of the site complicated, particularly if you want to log out.
- Login function should hide password when entering please (see below)

Password

Testpassword123|

Password must include at least one uppercase letter, one lowercase letter, one number, and one special character

- Is video filter functionality still a work in progress? Please check filters work
- Please review Footer - this needs to appear on every page and design needs to be finalised.
- When basic user clicks on premium clip, a card details box appears - users need to know what they're signing up for before entering details. Please could there be a "Subscriptions" page or similar.
- On Account Data page, "Current Subscription" displays as premium, even when logged into Basic. Please change.
- Toggle Notifications should say "Notify Me"

Toggle Notifications

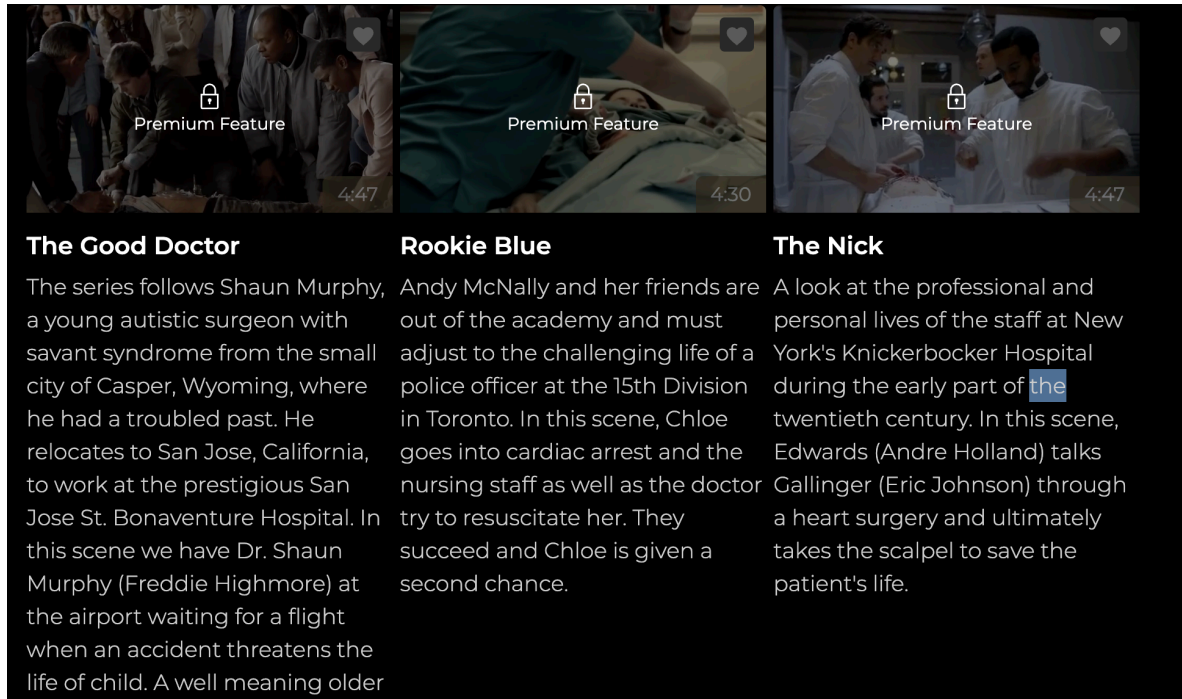

- In general, the site loads fairly slowly. Is this a work in progress?
- When reviewing the site, I got a "Session Expired" error message, both when in User mode and Admin mode. Is this a work in progress?

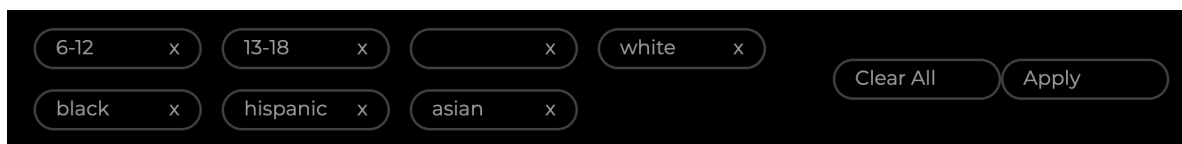

Visual Design

- Please could we include less descriptive text under each video. Possible to have a "Read More" drop down which expands the text? Ideally, each clip should have a max number of lines of text

underneath. A "read more" drop down would solve this. (see below)

- The Premium videos needs to have blurred out content - if a free user sees the title of the film/clip, its description and the thumbnail image, there's no incentive to sign up.
- Please check the spacing of Filter pills, particularly between Clear and Apply (see below)
- No Filter pills should appear empty (see below)

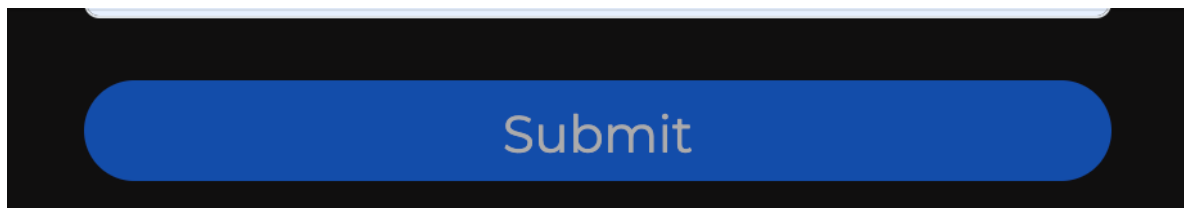

- Please line up search bar and page title to picture thumbnails (see below)

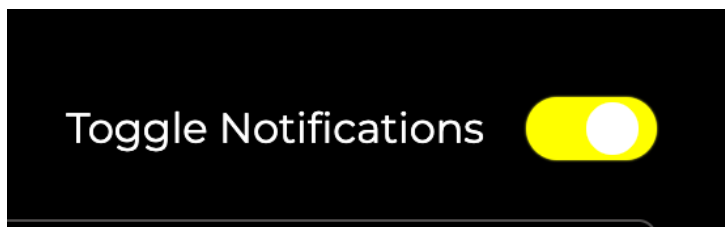

- All active states should appear #E39F37 to fit with Aktoo colour palette, not blue (see below)

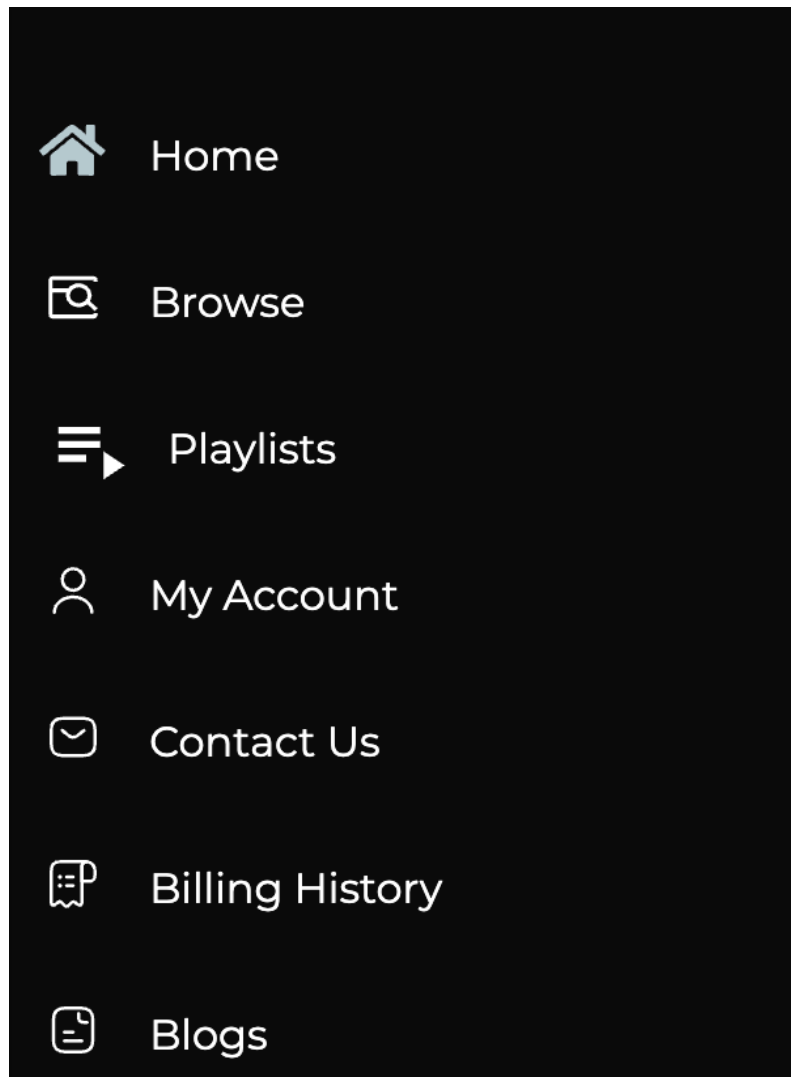

- Please change colour when button is pressed from blue to **#E39F37**. Form field outline should also not be blue (see two images below).

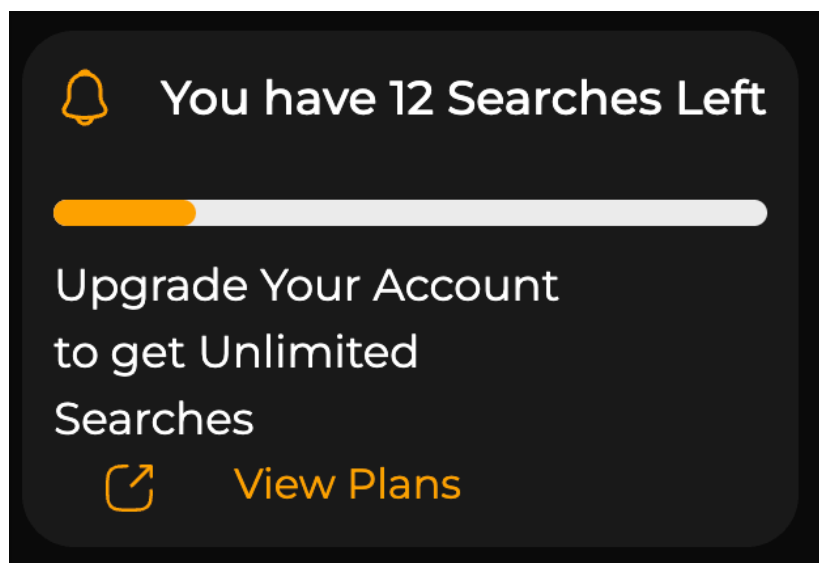

- Toggle Notifications active state should be **#E39F37**

- Please check iconography colour in burger menu. Inactive state should be uniformly **#FFFFFF**. Please also add an active state to indicate user location **#E39F37**. Please also check text alignment in burger menu (see below).

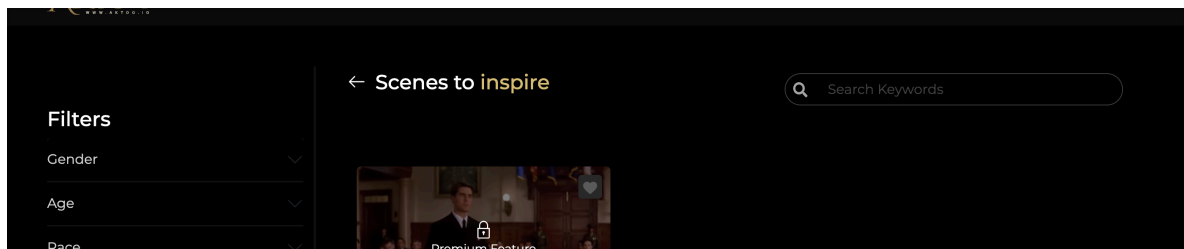

- Please check "Searches Left" card design - Text is bunched, icons need to be aligned

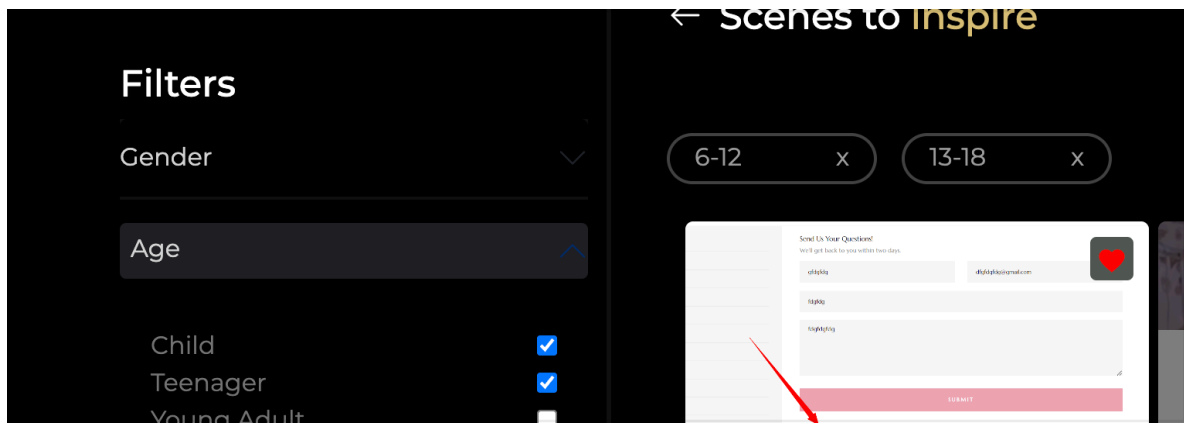

Site Content

- Browse page subtitle should be Browse. Please change from Scenes to Inspire to Browse.
- Each category page should have a subtitle. Eg: Lawyer videos page should have Lawyer as subtitle, rather than Scenes to Inspire (see below)

- I would suggest removing "Last minute audition" on the Homepage.
@chrystee - I think the copy of the site should be finalised.
- Please check spelling site wide eg: "sci-fi" on admin backend add clip page
- Category titles should not include "/" eg "Doctor/nurse/emt".
@chrystee - as discussed, I would advise a less specific title which covers everything like, in this case, "Medical Personnel"
- When more than one writer/director/producer is added to a clip, there should be a way to add commas between entries.
- Filter Pill copy should match what the user clicks - if "Young Adult" is clicked, that is what should be displayed on filter pill (see below)

- Please remove "Select Race Option" (see below)
